SLIMANE BENMAYOUF

FULL-STACK SOFTWARE DEVELOPER | INDEPENDENT ENTREPRENEUR | SAAS & AI SOLUTIONS

Email: slimanebenmayouf@mail.com • Phone: +1 514 449 0879

Portfolio: https://ithrantech.com/ • ComeUp: https://comeup.com/fr/@ithran

PROFESSIONAL PROFILE

Independent software developer and digital entrepreneur with freelance experience since 2019 and a background in occupational health, safety and environment (HSE). I design web applications, business tools and AI-assisted workflows for clients, and develop proprietary SaaS products aimed at international business customers. My work combines full-stack engineering, practical industry knowledge and end-to-end product delivery.

PROFESSIONAL EXPERIENCE

Independent Software Developer & Freelance Consultant — ComeUp | 2019–Present

- Completed more than 50 freelance assignments and received more than 40 positive customer reviews (figures documented in previous CV).
- Developed Python automations, websites, web applications and tailored digital tools; handled requirements, implementation, testing and customer feedback.
- Worked on AI integrations, database-backed workflows, deployment and maintenance of client-facing solutions.

Health, Safety & Environment (HSE) Inspector — Condor Electronics, Algeria | Aug 2018–Oct 2023

- Supported HSE policies, regulatory compliance, workplace risk prevention and internal audits referencing ISO 9001, ISO 14001 and ISO 45001.
- Gained first-hand domain knowledge now used in the design of digital safety-management software.

SELECTED SOFTWARE PRODUCTS AND PROJECTS

EvacStudio — Evacuation & Fire Safety Plan Editor | Product under active development | 2026

Full-stack web software for creating, cleaning, annotating and exporting evacuation plans. Includes an interactive editor, safety pictograms, QR/PDF output and optional AI-assisted plan processing. Built with Django REST Framework, Next.js/React and image-processing tools. Developed through iterative client testing; further productisation and commercial expansion are planned.

HSE Himaya — Health, Safety & Environment Management SaaS | Independent SaaS project | 2026

Modular HSE management platform covering organisations/sites, safety equipment, chemicals, personnel, accidents and evacuation plans. Uses Django, REST APIs, Next.js and relational databases; designed to digitalise safety processes for businesses.

Podcast Learning Progress Platform — Language School | Client application prototype | 2026

Web application to organise audio collections by groups and track learner listening progress, with student/admin interfaces and reporting. Developed in response to requirements from a school supporting approximately 150 learners weekly.

UPI Fire Safety Website — France | Client web project | 2026

Multi-page service website for a fire-safety company, including service descriptions, contact workflow and search-engine-oriented page structure; implemented using Hostinger site tools and custom HTML/CSS components.

Sumba Tourism Website — Indonesia | Client web project | 2026

Tourism agency showcase featuring destinations, experiences, image assets and map-related content; responsive presentation and multilingual expansion planning. Test version provided to the client.

ADDITIONAL WORK AND TECHNICAL STRENGTHS

Custom Business Applications & Automation | Freelance portfolio | 2019–Present

Client solutions across web development, Python scripting, integrations and automation. Relevant exploratory work includes inventory-management application architecture using Flutter and Supabase; this is not presented as a delivered client product.

TECHNOLOGY

Full-stack: Python, Django, Django REST Framework, JavaScript, TypeScript, Next.js, React, HTML, CSS, Tailwind CSS, REST APIs, JWT authentication.

Data & infrastructure: PostgreSQL, SQLite, MySQL, Firebase, Linux VPS, Nginx, Gunicorn, PM2, Git/GitHub, application deployment.

AI & automation: OpenAI API, computer-vision/image-processing workflows, OpenCV, Pillow, Pandas, Selenium, Beautiful Soup; experience with data analysis and machine-learning libraries.

Additional exposure: React Native, Flutter, Supabase, Figma, Photoshop, Illustrator, Chart.js, Tkinter.

EDUCATION

Diploma of Vocational Studies (DEP) — IT Support | École Supérieure Internationale de Montréal (ESIDEM), Canada | Completed 2026

1,800-hour vocational training programme in computer support and IT systems.

Master's Degree — Health, Safety & Environment | University of Batna, Algeria | 2015–2017

Bachelor's Degree — Quality, Health, Safety & Environment | University of Batna, Algeria | 2011–2015

Baccalaureate — Mathematics | Algeria | 2010

PROFESSIONAL DEVELOPMENT

Condor Academy / INPRP training: ISO 9001, ISO 14001, ISO 45001, ISO 31000, occupational accident investigation, hazardous chemicals, waste management, electrical safety and HSE processes. Self-directed software learning through online courses and practical projects.

LANGUAGES

Kabyle (native) • French (proficient) • English (basic)

ENTREPRENEURIAL DIRECTION

Develop and market software services and subscription-based SaaS products internationally, particularly fire-safety planning, HSE digitalisation and AI-supported business workflows. Interested in using Estonian e-Residency to establish and administer a legitimate EU-based digital business remotely, subject to the applicable legal, tax and banking requirements.
